

Exercise 1.1 – Use the Cicode Editor

Learning Outcomes

Upon completion of this exercise, you will:

- Be able to use the Comment tools to mark code as unavailable to the Cicode compiler.

1. Duplicate the existing code.

- i. Highlight the four lines of the **ChangeValue** function created in *Exercise - Goto Errors on Line Numbers* (page 1).
- ii. Click the **Copy** button on the toolbar to copy the selected text to the clipboard.
- iii. Position the cursor below the selected text and click the **Paste** button on the toolbar to paste the copied from the clipboard.
- iv. The next step will be to compile the project, but before that is done, Students should pause to consider what will happen.

2. Compile the project.

- i. Click the **Compile** button.
- ii. Confirm the result is as predicted in the earlier step.

3. Use the Comment tools.

- i. Highlight the second (pasted) function and click the **Comment** button.

If the **Comment** button is not visible, right-click the toolbars and select **Format** from the options displayed in the menu. Uncomment the lines of code by highlighting the text and clicking the **Uncomment** button.

Hints and Tips : Select some/all lines of text and click the **Indent** button to align the selected text to the right indent. Click the **Outdent** button to align the selected text to the left indent.

Hints and Tips : To set a bookmark next to the new function, right-click the Indicator bar next to the new code and press F2 key. The cursor will stop at each of the bookmarks.

4. Comment out all the lines of text in the second function.
